

December 1st, 2009.

To whom it may concern:

Through this letter I present: MR GERMAN HARVEY ALFEREZ, a lecturer at the School of Engineering and Technology in this institution.

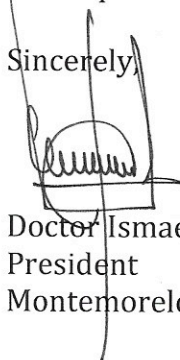

His work has opened new horizons for the development of faculty and students.

His concern for an actualized teaching, the dissemination of technological knowledge and research, have resulted in concrete projects that have stimulated the interest in science and technology.

His contribution has been enhanced by his commitment to the upbringing of the students' character through the reflection of moral values within the professional framework in computer science.

His current interest in academic enrichment undoubtedly is going to bring new development projects to the institution.

Sincerely,

Doctor Ismael Castillo
President
Montemorelos University
